

# The Utopian Project

Humanity has used up all of earth's resources and has begun to die off with the planet. However, the lone survivors are trying desperately to stay alive. We Need to set up outposts and colonies to try and create a utopian society that it can sustain itself. Scientist have estimated that there is only enough resources to last 15 more months.

The goal of the game is to create 2x2 grids of colonies. If that is done then the colony will transform into a utopia.

We only have a small number of people with us so we can only create 3 colonies ourselves.

Click on the grid to place a colony.

You get +100 points per utopian tile that is created. So +400 for every 2x2 grid.

The game is over when you run out of turns.

Save humanity...
